Before you replace your WMS: the checklist

Seven questions from Lynn Parnell, Logistics Partners Consultancy, to ask before deciding whether your WMS needs replacing or improving.

Tick the ones you can answer with a confident yes.

1	Is your WMS being updated regularly?	☐
2	Are your processes and layouts configured to make the best use of the WMS you are using?	☐
3	As your business or operation changes, are you able to reconfigure your WMS to match? And do you?	☐
4	Is every user properly trained in the use of the WMS?	☐
5	Do you have the best equipment and infrastructure to support your WMS?	☐
6	When did you last communicate with your WMS provider, and do they understand your operation?	☐
7	Is your WMS still delivering value to the business?	☐
